

# REGUPOL BRANCHES OUT WITH RECYCLED RUBBER FLOORING

## THE FUTURE OF SUSTAINABLE FLOORING IS LOOKING STRONG

Above: The new Regupol commercial rubber flooring catalogue is available now. Left: As well as the new colour range, Everroll can be tailored to suit custom corporate colours. Below: Outstanding static control makes Everroll suitable for technical environments. Bottom: Everroll's durable surface is tough enough for use in high-traffic areas.

There's exciting news for architects and interior designers looking for an environmentally sustainable floorcovering. Regupol Australia has announced the expansion of its highly successful recycled rubber flooring range. With a heritage of quality manufacturing and innovation, the new-generation Everroll range opens up a myriad of design and application possibilities.

Everroll's toughness and durability have been proven beyond doubt in a wide cross-section of commercial, educational, hospitality, fitness and government applications. With the introduction of the new colour range, Regupol has widened Everroll's appeal, ensuring that style and safety can go hand in hand.

That goes some way to explaining why retail fitouts have become another rapidly growing market for Everroll. Its excellent slip-resistant characteristics are critically important as businesses try to minimize the likelihood of slip and fall accidents, while outstanding sound-absorption qualities keep noise down to acceptable levels – a huge plus for many retail applications.

Like all Regupol products, Everroll satisfies today's demand for environmentally responsible products. It is composed of varying blends of post-consumer tyre rubber and post-industrial EPDM rubber. In fact, Regupol consumes over 20 million car tyres every year!

Regupol ensures all products are tested to comply with current industry standards, and stands by its products with ongoing technical support and professional service. As the largest stockist of rubber flooring in Australia, Regupol can offer fast and reliable distribution to end users and offers a complete project specification service for any project.

To receive a copy of the new catalogue detailing the Everroll collection, contact Olivia or Paul at Regupol on 02 9820 1233, or complete the enquiry card.
